📅 09/2023 - Present

SKILLS

Html	Css	Javascript	TypeScript	Firebase

React	React Native	Tailwind Css	Figma	Next js

SUMMARY

Curious and self-driven frontend developer with a strong foundation in HTML, CSS, and JavaScript. I transitioned into React and React Native, constantly expanding my skills through hands-on projects and daily learning. With a keen interest in modern web technologies, I bring creativity and problem-solving to every challenge. Passionate about building sleek, responsive, and user-friendly interfaces, I aim to continue growing my expertise while contributing to impactful projects.

KEY ACHIEVEMENTS

💎 **Your Achievement**

- **Developed multiple UI clones** using HTML, CSS, JavaScript, and React, showcasing ability to replicate modern web designs with precision and attention to detail.
- Successfully **created and launched a blog platform** using Firebase for user authentication and data storage, allowing users to subscribe for updates.
- **Contributed to two internships** (one unpaid, one paid), where I applied React and Tailwind CSS to build responsive, scalable web applications.
- **Actively participated in online learning and communities** (such as LinkedIn and GitHub), expanding my network and staying updated with the latest web development trends.
- Built and deployed a weather forecast app leveraging APIs to fetch real-time data, enhancing my proficiency in API integration and asynchronous JavaScript.
